The Zones of Regulation Leah M. Kuypers 2011 "... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

Becoming Heidegger Martin Heidegger 2007-06-07 In the decades since Martin Heidegger's death, many of his early writings--notes and talks, essays and reviews--have made it into print, but in such scattershot fashion and erratic translation as to mitigate their usefulness for understanding the development, direction, and ultimate shape of his work. This timely collection, edited by two preeminent Heidegger scholars, brings together in English translation the most philosophical of Heidegger's earliest occasional writings from 1910 to the end of 1927. These important philosophical documents fill out the context in which the early Heidegger wrote his major works and provide the background against which they appeared. Accompanied by incisive commentary, these pieces from Heidegger's student days, his early Freiburg period, and the time of his Marburg lecture courses will contribute substantially to rethinking the making and meaning of Being and Time. The contents are of a depth and quality that make this volume the collection for those interested in Heidegger's work prior to his masterwork. The book will also serve those concerned with Heidegger's relation to such figures as Aristotle, Dilthey, Husserl, Jaspers, and Löwith, as well as scholars whose interests are more topically centered on questions of history, logic, religion, and truth. Important in their own right, these pieces will also prove particularly useful to students of Heidegger's thought and of twentieth-century philosophy in general.
